A Healing Circle with

Rick Phillips

[15 Nov 2008 • English

Rick Phillips is recognized internationally as a powerful spokesperson for a global transpersonal spirituality. Rick's work is based on one principle: spiritual energy is the most powerful healing force and the journey to Spirit is possibly the most important journey of our lives.

In this intimate circle, Rick shares his personal inner and outer journeys into the realm of Spirit. What makes Rick unique and effective as a teacher and healer is his understanding of how to access the ordinarily hidden dimensions of spiritual reality in order to connect with our personal inner sources of wisdom and power.

Rick Phillips is the author of *Windows to the Soul* and *Healing Communication*. He is cofounder, with his wife Rachel Kaufman, of the Deva Foundation in U.S.A.. They travel all over the world, working with individuals, offering lectures and workshops on themes of personal and planetary healing. In addition, they devote much of their time to developing the charitable aspects of the Deva Foundation in its role of service and social action for the planet. Rick is a practitioner of Chinese medicine and has taught many meditation practices. For more information about Rick and his work, you can reach him at www.deva.org.

INDIVIDUAL HEALING SESSIONS with Rick Phillips

We believe that every human being is unique and special; that each of us has an individual history of experience that is physical, mental, emotional and spiritual; that this totality of experience lives in our conscious and unconscious being and that it directly determines how we live our everyday lives. We also believe that every individual has, deep within, a central spiritual source. This inner knowing is often called the Higher Self. Call it Higher Self or another name, it makes no difference. It is that part of us that is all-knowing and all-loving. The Higher Self is the totally accepting Divine force within us all that is always available for healing, growth and guidance.

To facilitate your unique healing process, we assist you in consciously connecting to this Divine Energy and through this connection; we help you energetically clear the attachments of your Emotional Body.

The Emotional Body is that energetic part of us that holds addictions and attachments. It is the seat of our anger, fear, sorrow, judgment and guilt. It is what keeps us from experiencing our true power and bliss. Through the quickening energy of your Higher Self, Deva Facilitators help you distill out of the Emotional Body those themes that have blocked or inhibited certain areas of your life. The Deva process facilitates the energetic clearing of old habitual behavior patterns that, although we know intellectually we no longer need, we keep repeating anyway. Once these themes are cleared, we are free to manifest our full potential.

The sessions provide inner experiences which may include past life recall, present life memories, symbolic or allegorical stories, and physical and emotional releases. By healing the old, you make way for the new. The Deva sessions are truly multidimensional. The Higher Self may guide you into an infinite variety of possible experiences*.

This psychospiritual clearing work consists of 2 - 4 sessions that last from two to three hours each. Additional sessions can be scheduled in one series or separately.

WHAT DO PEOPLE WHO HAVE DONE THE WORK HAVE TO SAY?

"I didn't experience ecstasy on the table. I experienced sadness, sorrow, anger, fear and an intense feeling of incompleteness. The ecstasy and bliss came later as my Higher Self filled those wounded places with love and light. A true healing experience!"

Norman West, Advertising Executive Jackson, Mississippi, USA

"In that climate of absolute trust and safety, I experienced the change of my life. I now see things with such clarity and have become my own discoverer of my Divine Self."

Uve Jarck, Businessman, France

"My life is changed forever. I am no longer burdened by life's complexity, but rather experience peace in a way I never imagined possible. With this comes a sense of freedom which speaks of new opportunities, success, and a world filled with joy rather than pain."

Diane Sarris, Psychologist, Chicago, Illinois, USA
